

*Dark matter may make up more than 90% of the universe. Dark matter cannot be seen directly but we can know its effects.*

# *skyline* **EARTHLINES**

*By Diane Pendola*

Winter 2017  
Dark Mother

Dark Mother

absorbs the whole of the created Universe into Herself.

The Milky Way is but a strand of light that nourishes our human gaze from earth,  
a thread in her diamond necklace of endless creativity.

Matter,  
from the Latin, Mater,  
is dark.

Our mind would like to peer inside,  
but She remains invisible to our  
intellect.  
Her womb holds an infinity of secrets.  
But her heart,  
Oh her heart throbs in our deepest  
depths.

Like a star she descends into the smallest of us,  
the weakest and the poorest.

She plants her Word in us.

We hear her pulse.

In the deepest intimacy of our being  
we vibrate with this pulse,  
become this pulse.

She is the whole Universe,  
the one song singing  
through the deep throated chords of creation.  
And She is us,  
singing back our rose throated hymn.

Say Yes.

The Angel Gabrielle is the angel of the night,  
the angel of the moon who reflects the solar light.

We cannot gaze into the sun.

So we are given the moon.

In the night the soft and gentle light

surrounds us like a halo,

like a mother's arms.

We say yes.

Let this Mystery come to us.

Let this star be born in us.

Let our yes create our destiny.

Let our freedom be the yes

that undoes

every

fearful

no.
